

International Conference on

Robotics & Automation

1st-3rd

March, 2027 | Berlin, Germany

Scientific Topics:

- Industrial Robotics & Smart Manufacturing
- Autonomous Robots & Intelligent Systems
- Human-Robot Interaction & Collaborative Robotics
- Robot Perception & Computer Vision
- Robotic Motion Planning & Control Systems
- AI-Powered Robotics & Intelligent Automation
- Autonomous Vehicles, Drones & Mobile Robots
- Mechatronics & Embedded Robotic Systems
- Digital Twins, Industry 4.0 & Smart Factories
- Robotics in Healthcare, Agriculture & Service Industries
- Autonomous Robotics & Intelligent Systems
- Collaborative Robotics (Cobots) & Human-Robot Interaction
- Industrial Automation & Smart Manufacturing
- Robot Vision, Perception & Sensor Fusion
- Motion Planning, Navigation & Control Systems
- Autonomous Vehicles, Drones & Mobile Robotics
- AI-Driven Robotics & Intelligent Automation
- Mechatronics, Embedded Systems & Robotic Design
- Digital Twins, Industry 4.0 & Cyber-Physical Systems
- Robotics Applications in Healthcare, Agriculture & Logistics

ABOUT CONFERENCE

Welcome to the International Conference on Robotics & Automation, organized by Innovatex Conferences and scheduled for 1–3 March 2027 in Berlin, Germany. Guided by the theme "Industrial Robotics, Autonomous Systems, AI-Driven Automation, and Collaborative Robotics for Future Industries," this event brings together global researchers, engineers, and industry leaders to share insights and explore the latest innovations in robotics and intelligent automation. The conference offers nearly thirty focused scientific sessions covering industrial robotics, autonomous systems, collaborative robotics, smart manufacturing, AI-driven automation, and Industry 4.0 technologies. Participants will engage in keynote lectures, interactive presentations, and dedicated poster sessions showcasing emerging research and technological breakthroughs. Set in the vibrant innovation hub of Berlin, the event provides an excellent platform for learning, networking, and discovering the technologies shaping the future of robotics and automation.
